

PIPE RAMPS

Pipe ramp to facilitate pumped water or sewage to cross site traffic roads. Ramp built with ribbing structure to help cope with construction traffic on level roads.

The ramp saves any trenching or bridging of pipes making pump and pipe installation a much easier and quicker job.

KEY FEATURES

- Heavy duty Constructed ramps built for Site Traffic where pumped water has to cross a road way.
- PN 16 flanged ends so customer specific couples or hoses can be fitted to suit.
- Crane lifting hooks for easy positioning.
- 4 heavy duty stake holes to prevent movement of ramps.
- Unique stacking facility to help safe storage of ramps in depot yard.
- Painted Signal Yellow to warn drivers.
- Optional "SLOW" Signage fixtures.
